

EVERY CHILD DESERVES AN EXCELLENT EDUCATION

In Kenya's capital of Nairobi, nearly **63% of students live in marginalized communities** with minimal access to government schools. These communities have established community schools where resources are scarce.

At Dignitas, **we empower educators** to transform these schools through leadership training, instructional coaching and infrastructure support.

The Stawisha Institute for School Leaders empowers educators to take charge of transforming their schools through professional development.

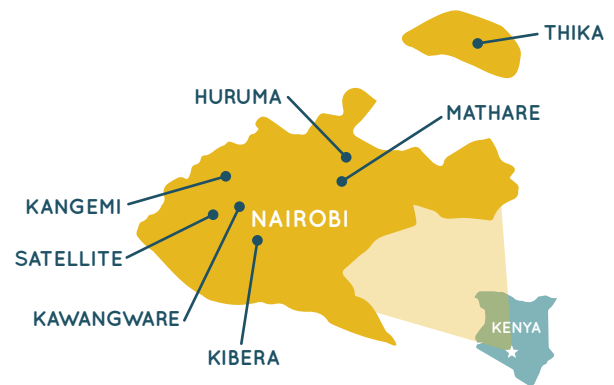

Coaches provide one-on-one support for the growth and development of educators.

Small grants provide funding for schools to address basic infrastructure needs like safety, access to clean water, and desks for every student.
